[^0]Joseph Coccaro, President and Chief Executive Officer, said, "We are pleased with our results for 2022. We had over $\$ 225$ million in new loan originations, which increased our loan portfolio by $\$ 149$ million during the year. We continue to have strong credit quality as non-performing loans and criticized assets remain low. We continue to see improvement in our net interest margin which rose 24 basis points and 26 basis points as compared to the three and twelve months ended December 31, 2021, respectively."

Mr. Coccaro further stated, "We are pleased to report continued consistent earnings and exceptional loan growth during a challenging economic environment in 2022. We expect loan growth to slow in the first quarter as interest rates continue to increase, higher inflation and the continued low inventory in housing will slow the market. Increased interest rate liability costs may impact future earnings."

## Average Balance Sheets and Related Yields and Rates

The following tables present information regarding average balances of assets and liabilities, the total dollar amounts of interest income and dividends from average interest-earning assets, the total dollar amounts of interest expense on average interest-bearing liabilities, and the resulting annualized average yields and costs. The yields and costs for the periods indicated are derived by dividing income or expense by the average balances of assets or liabilities, respectively, for the periods presented. Average balances have been calculated using daily balances. Nonaccrual loans are included in average balances only. Loan fees are included in interest income on loans and are not material.

The following table sets forth the effects of changing rates and volumes on net interest income. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The net column represents the sum of the prior columns. Changes attributable to changes in both rate and volume that cannot be segregated have been allocated proportionally based on the changes due to rate and the changes due to volume.
